

The power of a desktop. The size of a tablet.

Microsoft Surface – available from O₂

Break free from the 9 to 5

The Microsoft Surface's long battery life means that you can work remotely and on the move for longer. With video playback alone, you'll last up to 10 hours before the need to recharge. It can run software usually only suitable for a desktop. That includes the full Office suite of tools, thousands of other Windows-based programs and comes with Windows 10 pre-loaded.

Because it's able to handle multiple applications at the same time, multitasking has never been easier. And that has a knock-on effect in terms of increased productivity. You can write meeting notes directly onto the screen – and even record the meeting at the same time.

Super-fast sharing

The fast 4G connection from O₂ makes collaboration with colleagues, customers and suppliers even easier. The Surface is ideal for streaming video presentations, sharing and amending complex presentations and documents, plus accessing the web seamlessly.

Use it how you like

The Surface comes with a stand that can be used in three positions, while a detachable keyboard, which is sold separately with details overleaf, allows you to connect a range of other devices.

What's under the cover?

- 10.8" full HD touchscreen
- 8 megapixel camera on the back
- 3.5 megapixel camera on the front
- Quad-core 1.6GHz processor
- Windows 10
- Full-size USB 3.0 port

The Surface 4G comes in 64GB or 128GB versions, with the option of adding up to 128GB more via a microSD memory card.

Get even more out of your Surface with these accessories

Type Cover

Just add the Type Cover to your device and turn it into a laptop. A super-thin keyboard and a screen cover, it clips magnetically into place, has backlit keys and comes in five colours.

Pen

One click on the screen with a Surface Pen automatically opens OneNote, Microsoft's pre-loaded note-taking app. It leaves you ready to draw or jot down ideas, make a list or take minutes. You can also use Surface Pen in programs like PowerPoint and Word.

Dock

The dock lets you turn your Surface into a desktop, and connect external monitors, keyboards and more. It comes with high-definition video, high-speed USB and Ethernet ports, plus an audio output – helping you increase your productivity further.

Surface Pro 4 is coming soon to O₂

Why O₂?

We're trusted as the mobile provider for some of the UK's most respected organisations with years of unrivalled private and public sector mobile experience. We're the only network operator to have the CAS(T) certification for mobile voice and data services and were given the Best Network Coverage award by uSwitch in 2014. While others may offer a single product or solution, we have a substantial portfolio of Enterprise Mobility solutions which can stand alone or be integrated together, including platforms, devices, applications and even on-premise, hybrid and cloud-based solutions.
