O$_2$ business

O$_2$ UC
Empowering your people

Work is what you do, not where you are. Discover our truly mobile-first Unified Communications (UC) service, O$_2$ UC, and enjoy a fully managed service with an associated tariff on the latest devices.

O$_2$ UC is a breakthrough. It offers private and public sector teams everything they need to work from anywhere – all for a simple, competitive per-user monthly price.

Why not make it even easier to reap the rewards of collaborating on the go, by choosing O$_2$ UC? With full expert support to a cloud-based UC capability, it's the ideal choice for enterprise deployments. And whilst the load on your IT and procurement teams is lightened, you can then watch the productivity of your workforce heighten, achieving better results through effortless collaboration, and deliver an even more satisfying service to your customers.

The complete O$_2$ UC service

Your fully-managed O$_2$ UC service includes everything your flexible organisation needs:

- **A choice of UC services:** Hosted MiCloud or Skype for Business, with all the telephony, messaging and collaboration tools your people need to be productive on the move.

- **A choice of tariffs:** Choose the UC plan that best suits your usage requirements. Combine with a mobile tariff to benefit from the true mobile-first UC solution.

- **A choice of mobile devices:** Take your pick from a supplier-approved list of softphones, including the latest devices on iOS and Android platforms.

Built for mobile

With O$_2$ UC, you can support today's increasingly more mobile workforces and move away from fixed wired communications. With your O$_2$ UC service in the cloud, you'll free your IT teams from the time and cost of managing on-site PBXs. And with a single per-user, per-month charge that includes the user's mobile tariff, it's easy to keep track of prices at the same time as reducing demand on hard-pressed IT resources.

Fast-track your organisation to a new era of productivity and efficiency. Empower your people to work from anywhere with O$_2$ UC.

- Infrastructure-free.

- Secure and scalable.

- Fully supported.

- Transparently priced.

Convenient and efficient, the way it should be.

Three great reasons to choose O₂ UC

- **UC capabilities, anywhere:** Access to your fixed and mobile number, instant messaging and presence. Empowering your mobile workers.

- **Simplicity:** With a single tariff as well as clear, scalable pricing bands from 350 to 2,500 users, you can mobilise as many of your people as you choose.

- **Cut cost and complexity:** Mobilise telephony by moving your communications to the cloud. All with a convenient managed service.

The perfect fit for you?

O₂ UC means you don't have to sacrifice productivity for flexibility. Organisations can use O₂ UC to drive cost efficiencies or better manage case work, for example, letting team members receive calls while they're out and about, while only giving some contacts the ability to reach them around the clock. Businesses can focus on building an always on, highly productive workforce without infrastructure spend.

Are you looking to explore UC but already have a complex fixed telephony infrastructure?

Migrating to UC from an existing telecoms setup like a PBX, ISDN or private circuits can be a demanding task. So make life simple instead. With O₂ UC, you can get full UC features regardless of your setup, at a fixed price per-user, per-month.

Are you reaching the end of a PBX contract, or have you got multiple PBXs?

Replace the complexity of multiple PBXs and contracts with a single scalable cloud-based service. With O₂ UC, there's no need for expensive onsite PBX equipment or maintenance agreements. And because of its flexibility, you can migrate to O₂ UC one site or business unit at-a-time, adding a new site as its PBX agreement expires.

Do you have a large mobile workforce?

Having a large workforce doesn't always make for a collaborative and effective one. And security is always a concern, especially as works becomes more mobile. O₂ will work with you to select the most suitable UC client and tariff, according to the size and needs of your organisation. So why not make deployment and enrolment stress-free with O₂'s suite of Managed Logistics and Mobile Device Management capabilities?

Good news for public sector customers...

You can enjoy O₂ UC as a direct award through your Network Services agreement (RM1045) – and get £100 per-user to put towards the cost of new devices or other essential investments.

Why O₂?

We are the only IT communications provider offering a simple price per-user UC model attached to a clear monthly mobile tariff as a managed service. And all supported by our rich connectivity portfolio and 30-year mobile heritage. Our mobile first technology strategy makes us an unrivalled partner for any flexible working project. Beyond that, our O₂ UC offer has real simplicity at its heart. A UC application combined with a single tariff, on a device and wrapped with a managed service of your choice. O₂ is the only provider to achieve sought-after CAS(T) certification over both our mobile and Wide Area Network (WAN) infrastructures too, making us the safe choice in every way.
