

Get more from your fleet with real-time vehicle information

As part of the O₂ Smart Vehicle portfolio, O₂ Track and Go is an entry-level tracking solution that uses a plug and play device which provides full visibility of your business fleet.

The O₂ Track and Go plug and play device clips easily onto a car's diagnostics port. You can install it yourself and move it between vehicles, and it supplies:

- Real-time vehicle location
- Trip visualisation
- Unlimited geofencing
- Alerts and reports

One supplier across the UK and Europe

We offer full connectivity across all UK networks and EU28 European countries where we have roaming agreements. And that's included within the monthly fixed subscription. Unlike others, we also provide an end-to-end service wrap, covering devices, set-up and in-life support – meaning you don't have to waste time and effort managing multiple suppliers.

Company benefits

You'll be able to pinpoint exactly where each vehicle is – giving you greater scope for balancing vehicle availability. We will also send you an alert if your vehicle has been involved in an accident, allowing you to contact the driver to arrange recovery and repair, helping to reduce operational costs. Its trip visualisation capability also allows you to control costs by being able to analyse historic trips, while geofencing allows you to analyse the time spent in specific location types – such as home, office, customer site, etc.

What you get with O₂ Track and Go

- Real-time location data: viewed through a web portal
- End-to-end solution: no more multiple suppliers
- Full UK and European coverage: and if a vehicle travels outside this, the solution will save all data and transmit it when back in coverage
- World-leading technology: including hardware, firmware and software
- Easy installation: install yourself (or through a specialist)
- Easy integration: with any platform to build value-added services
- Best-in-class device: over 500,000 OBDII telematics devices deployed in 70 countries*
- Telefónica track record: over 100,000 telematics units installed in vehicles worldwide across multiple suppliers**

We'll support you all the way

Want to learn more? Talk to your Account Manager or email us at o2smartvehicle@o2.com and we'll arrange some time with one of our IoT Sales Specialists.

Why O₂?

We are a trusted adviser with years of unrivalled business mobile experience. Whilst others may offer a single product or solution, we have a substantial portfolio of Enterprise Mobility solutions which can be integrated, including platforms, devices, applications and even on-premise, hybrid and cloud-based solutions.
