

Seven ways to make your workforce more mobile

With the increase in remote workers and flexible working hours becoming the norm, people need an IT environment that lets them work securely, work together and work successfully. Here are seven ways to make it easier for your people to get things done, wherever they are.

Intelligence, insights and automation

Insights from Artificial Intelligence (AI), chatbots machine learning, help your people make better business decisions, faster, reducing time-consuming routine tasks and freeing up capacity for more complex responsibilities

Mobile first

Choose smartphones and tablets, to give your employees flexibility and convenience, plus access to the information they need, when they need it

Cloud adoption

Swapping to cloud-based solutions means your people can access services on demand, wherever they are, on any device

Quicker deployment

Zero-touch activation makes it possible to automate sign-on, so people can log on and get to work quickly – with little involvement from the user or anyone else

Geocollaboration

Embracing collaboration tools, means the right people can get together, without location becoming a barrier

Zero trust security

Treat everyone and every device trying to access your network with the same suspicion. Build a Zero Trust Security Architecture to keep your network safe, even as people connect from all-over, on all devices

Simplify information

Use tools to filter files based on job role, so people can access the information they need more easily, and get on with work more efficiently
