4G tablets on the UK's most secure commercial mobile network

The No. 10 tariff. Exclusively for the Public and Third Sectors

Join the UK's most secure commercial mobile network with our Public Sector tariff for tablets and help your people be more productive – without the usual data security concerns. With our No. 10 tariff there's a new bolt-on that provides Mobile Device Management (MDM) for your tablets. So your team can be more mobile and present in the community, without adding any additional management strain on IT.

Because we're the UK's first government-approved CAS(T) certified mobile network for voice and data, you get peace of mind, too. And simplicity, because the tariff is available as a Direct Award option under PSN Lot 6.

A flat rate of £10 per month per connection

Get a 4G data-only connection, which includes 5GB of data per month. With that you receive £100 of connection credit to offset against a device of your choice. We are also offering the option of adding MDM as a bolt-on for increased control over the data on user devices for only £2 per month per connection.

Your £100 connection credit can be used towards devices including:

- Apple iPad Air 2 16GB
- Samsung Tab 4
- Dell Venue 11 (Windows 8.1 Pro Software)

The ins and outs

The No. 10 tariff is only available to the Public and Third Sectors through the PSN Framework. At the end of the term you'll have the option to keep the devices or upgrade to new ones. Or hand them into O₂ Recycle to get back some of the value of the devices. Please see our terms and conditions*.

4G ready

The £10 per month charge will enable you to access 4G from a tablet on the UK's most secure commercial mobile network, helping to accelerate your organisation's digital plans and enabling your people to do more when they're out and about.

4G is being rolled out across the country for your benefit. You can check coverage in your area here: o2.co.uk/coveragechecker

Mobile Device Management

We recognise that Public Sector organisations must ensure the highest standards of security for the information they process, so we're offering MDM as a bolt-on for an additional £2 per month per connection. MaaS360 provides the ability to control, configure, manage and report on your organisation's smartphone and tablet devices.

Our MDM offer is a device-agnostic, cloud-based system that is easy to deploy and gives your IT department the control to manage apps, settings and proactively secure your data. This means that you can deploy it both for No. 10 tablets, and to existing tablets and smartphones that your organisation already deployed. Policy updates, briefings and guidelines can be distributed immediately, ensuring that your people are working with real-time information.

This MDM solution can help bring you the benefits of workforce mobilisation in a secure environment, empowering your employees to give a better service to citizens and communities.

Why O₂

We provide a simple, transparent and cost-effective procurement process for all our Public and Third Sector customers. We have the expertise and experience to build the right digital solutions to bring the benefits of digital technology to everyone in the Public Sector. From tablets and apps, to M2M connectivity and managed services, we have it all to offer. We're an approved provider through the PSN Services Framework, G-Cloud Framework and Telephony Bridging Framework and offer the UK's most secure commercial mobile network through our CAS(T) accreditation.
